

Company Laptop Terms of Use

Brisart Research Archive

Effective Date: June 15, 2026

These Company Laptop Terms of Use ("Terms") govern the use of any company-owned laptop, workstation, or related endpoint device (collectively, "Company Device") issued by Brisart Research Archive ("Company"). By using a Company Device, each user acknowledges that the device is provided solely for authorized business use, agrees to comply with these Terms and all applicable Company security requirements, and understands that failure to comply may result in suspension of access, disciplinary action, or other corrective measures.

1. Ownership and Control

All Company Devices, associated peripherals, installed software, business accounts, and business data remain the sole property of the Company. Issuance of a Company Device does not transfer any ownership interest to the user. The Company reserves the right to configure, manage, update, restrict, audit, or revoke access to any Company Device at any time in order to protect Company systems, data, intellectual property, and operations.

2. Authorized Use

Company Devices are provided to support approved business activities. Limited incidental personal use may be permitted only if that use is lawful, minimal, does not interfere with work responsibilities, does not consume significant Company resources, and does not create security, legal, or reputational risk. Users must not use Company Devices for outside business ventures, unauthorized side work, unlawful activity, or any purpose that conflicts with Company interests.

3. Security and Device Management

Users agree that Company Devices may be enrolled in and managed through enterprise security and device management platforms, including but not limited to Microsoft Intune, Microsoft Entra ID, and Microsoft Defender. Management actions may include application control, security baselines, compliance enforcement, remote configuration, software deployment, encryption enforcement, access restrictions, logging, and remote lock or remote wipe where necessary to protect Company assets.

4. User Responsibilities

Each user is responsible for maintaining the physical and logical security of the assigned Company Device. Users must keep passwords and authentication factors confidential, use only Company-approved sign-in methods, lock the device when unattended, promptly apply required reboots and updates, and immediately report loss, theft, suspected compromise, malware alerts, phishing incidents, or any unusual device behavior to the Company administrator or designated security contact.

5. Data Protection and Confidential Information

Users may access, create, process, and store Company information on Company Devices only as necessary for authorized work. Confidential materials, research assets, internal records, credentials, customer or partner information, unpublished intellectual property, and regulated or sensitive data must be handled in accordance with Company policies and applicable law. Users must not copy, transfer, synchronize, or back up Company data to unapproved personal storage, consumer cloud services, unapproved USB media, or unauthorized applications.

6. Monitoring and Privacy

To the extent permitted by law, users acknowledge that the Company may monitor, log, inspect, preserve, or review activity on Company Devices and related business services for security, compliance, operational, investigative, and legal purposes. Monitoring may include device inventory, security status, application usage, access logs, network activity, file events, and policy compliance data. Users should have no expectation of personal privacy when using Company Devices, except where otherwise required by applicable law.

7. Prohibited Activities

Users must not: (a) disable or attempt to bypass security controls; (b) install unauthorized software, scripts, browser extensions, or tools; (c) use administrative privileges without approval; (d) share accounts or credentials; (e) access, store, or distribute unlawful, offensive, or inappropriate content; (f) connect unauthorized peripherals or removable media; (g) use the device to circumvent licensing, copyright, or usage restrictions; (h) attempt to exfiltrate, alter, or destroy Company data without authorization; or (i) engage in any activity that may compromise the confidentiality, integrity, or availability of Company systems or information.

8. Software, Updates, and Support

Only Company-approved software and services may be installed or used for business purposes on Company Devices. The Company may automatically deploy, update, remove, or restrict software as needed. Users must not interfere with security tools, update processes, encryption settings, compliance checks, or required restart schedules. Support requests should be directed through Company-approved support channels.

9. Network and Access Requirements

Access to Company resources may be conditioned on compliance requirements such as device registration, encryption, patch level, anti-malware status, identity verification, multi-factor authentication, and acceptance of Company policies. The Company may block, limit, or revoke access from noncompliant, untrusted, jailbroken, rooted, or otherwise risky devices or sessions.

10. Loss, Theft, and Incident Response

If a Company Device is lost, stolen, misplaced, tampered with, or suspected to be compromised, the user must report the incident immediately and without delay. The Company may take emergency response actions, including session revocation, account restriction, geolocation review where available, remote lock, or remote wipe. Users agree to cooperate fully with incident response, remediation, and forensic review efforts.

11. Return of Property and Separation

Upon request, role change, leave of absence, upgrade, reassignment, or termination of employment or engagement, users must promptly return the Company Device and all related equipment in good condition, subject to ordinary wear and tear. Users must not retain Company data, credentials, copies, backups, notes, or local archives after separation unless expressly authorized in writing.

12. Violations

Violation of these Terms or related Company policies may result in removal of device access, temporary suspension, permanent revocation of privileges, disciplinary action, financial responsibility where appropriate, and referral for legal action if warranted. The Company reserves the right to take any additional protective or corrective action necessary to safeguard its people, systems, data, and business interests.

13. Changes to These Terms

The Company may revise these Terms from time to time to address operational, security, legal, or business needs. Continued use of a Company Device after updated Terms are presented constitutes acknowledgment of the updated requirements, subject to any additional consent process the Company may require.

14. Acknowledgment

By accepting these Terms, the user acknowledges that the user has read and understands these requirements, agrees to comply with them, understands that Company Devices are actively managed and monitored, and agrees that access to Company resources is conditioned on compliance with these Terms and applicable Company policies.

User Acknowledgment

I acknowledge that I have received, read, and understand the Company Laptop Terms of Use. I agree to comply with these Terms as a condition of being issued or permitted to use a Company Device and to access Company systems and data.
