

Brisart Licensing

The central source of truth for licensing, subscriptions, commercial-use rights, and ecosystem participation across the Brisart software and framework ecosystem.

Covered Projects

- BrisartResearchArchive
- BrisartDevTools
- BrisartPreservationTools
- BrisartIdentityTools
- BrisartFrameworks

and any future Brisart project unless that project explicitly states otherwise.

What's In This Repository

File	Purpose
LICENSE.md	The only legally controlling document. Covers free-use rights, subscription rights, commercial-use rights, framework use rights, cancellation terms, pricing, definitions, and ecosystem participation requirements.
PARTICIPATION.md	Non-binding guidance on ecosystem participation. Covers donations, implementation requests, and research participation. Does not grant, modify, or restrict any legal right. Refer to LICENSE.md for all permissions, restrictions, and subscription rights.

Frameworks

Brisart Frameworks are original theories, models, methodologies, specifications, workflows, symbolic structures, technical frameworks, research frameworks, and related structured materials developed and published by Brisart.

Published frameworks may be read and studied without a subscription.

Modification, adaptation, implementation, extension, commercialization, and the creation of Brisart-Derived Work are governed by LICENSE.md.

Philosophy

Brisart software and frameworks are developed first to support the operational and research needs of the Brisart ecosystem itself.

The ecosystem emphasizes:

- Local-first operation
- Auditability
- Long-term maintainability
- Source availability
- Research-oriented development

Researchers, labs, institutions, and organizations with similar requirements may benefit from the same ongoing development, subject to the terms described in LICENSE.md.
